TECHNICAL SKILLS

Backend: Node.js, Express.js, REST APIs

Database: MongoDB (MongoDB Atlas)

Cloud and Storage: Cloudinary

Frontend: HTML, CSS, JavaScript, React (Basic)

Tools & Deployment: Git, GitHub, VS Code, Render, Postman

Concepts: CRUD Operations, Routing, API Integration

PROJECTS

1. Blog API - Backend REST Service

Node.js | Express.js | MongoDB | Cloudinary | JWT | Render

- Designed and deployed a secure RESTful blog API with complete authentication and authorization system.
- Implemented JWT-based authentication using HTTP-only cookies with refresh token rotation and database validation.
- Built full Blog CRUD with owner-based access control and secure image uploads via Cloudinary.
- Developed pagination, search and sorting using MongoDB aggregation pipeline with \$facet for optimized data retrieval.
- Strengthened API security with global and route-specific rate limiting, CORS configuration and centralized error handling.
- Deployed live backend service on Render with environment-based production configuration.

Live API: <https://blog-app-71ay.onrender.com/api/docs>

2. Smart Travel API - Backend REST Service

Node.js | Express.js | Axios | Swagger UI | Render

- Designed and deployed a RESTful API that aggregates real-time city travel data from multiple external APIs into a single unified response.
- Integrated OpenWeatherMap, GNews and Geoapify APIs to fetch live weather, AQI, top places and local news headlines for any city.
- Built a custom in-memory caching system to reduce redundant external API calls and improve response times.

- Developed a custom metrics system tracking total requests, external API calls, failures, average response time and cache performance.
- Documented all API endpoints using Swagger UI following OpenAPI 3.0 specification, accessible via live docs URL.

Live API: <https://smart-travel-api.onrender.com/api/v1/docs/>

EDUCATION

Bachelors of Computer Applications

Vidya Vihar Institute of Technology | 2022-2025 | CGPA: 8.9

Intermediate

Millia Convent English School | 2018-2020 | Percentage: 87.2 %

Matriculation

Millia Convent English School | 2017-2018 | Percentage: 83.4 %

LEARNING & DEVELOPMENT

Actively strengthening backend development skills through self-practice and guided learning.

Exploring topics such as authentication, error handling, database optimization, and scalable API design using Node.js and MongoDB.

LANGUAGE

Hindi | English
